DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-55, drawn to add-on card insertion for expansion purposes, classified in class 710, subclass 301.
 - II. Claims 56-58, drawn to a secured communication system, classified in class 713, subclass 150.
 - III. Claims 59-62, drawn to an apparatus with secured access, classified in class 713, subclass 182.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions I, II, and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combinations (Inventions II and III) as claimed do not require the particulars of the subcombination (Invention I) as claimed because the omission of details of the claimed subcombination is evidence that the patentability of the combinations do not rely on the details of the specific

subcombination. The subcombination has separate utility such as providing for the expansion of a processing system by inserting add-in cards.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
